## GUIDE TO SINGLE USE PLASTIC ALTERNATIVES

There are a number of retailers offering more sustainable alternatives to all the single use plastic items that you may require for your business (and the list is growing every day!)

The following tables cover some great suppliers to get you started. Whilst this list is by no means exhaustive (or is any particular supplier endorsed) this is a great starting point for your business to discover some relevant alternatives based on your requirements.

These range from plant-based single use items, commercial and home compostables to reusable items as well as infrastructure / circular systems to further support the uptake of reusables.

They include everything from bottles, cups, straws, cutlery and bags to all types of packaging, trays and cling film.

You will also find a direct link to each supplier on our Supplier Resources page ([byebyeplastic.org.au/toolkits-resources/suppliers-resources/](https://byebyeplastic.org.au/toolkits-resources/suppliers-resources/)), where you can sort by category.
